COMMON SPECIFICATIONS

-  Modern and ergonomic design
-  Unified platform that integrates the acquisition station (monitor 2MP da 24") for digital systems
-  Short Isocentric C-arm
-  Modern and functional accessories and optional devices
-  Immediate access to technical assistance
-  Installation on Van

Serenys

ANALOG MAMMOGRAPHY FOR 2D IMAGE ACQUISITION

- 2D analog system
- Isocentric C-arm
- Automatic collimation
- Upgradable with DR detector
- Optional stereotactic biopsy device

Serenys DR C

DIGITAL COMPACT MAMMOGRAPHY FOR 2D IMAGE ACQUISITION

- 2D complete digital mammography system
- Isocentric C-arm
- Digital full field detector (two versions)
- Integrate or separate Acquisition Workstation
- Cost-effective solution
- Not upgradable to tomosynthesis and biopsy exams

Serenys DR

DIGITAL MAMMOGRAPHY

(PREDISPOSED FOR TOMOSYNTHESIS AND BIOPSY PROCEDURES)

- 2D complete digital mammography system
- Upgradable to tomosynthesis
- Fully motorized isocentric C-arm
- Digital full field detector (three versions)
- Optional stereotactic biopsy device
- Integrate or separate Acquisition Workstation

Serenys DR DBT

DIGITAL MAMMOGRAPHY FOR TOMOSYNTHESIS

- Top of the line mammography system
- Fully motorized isocentric C-arm
- Digital full field detector (three versions)
- 2D or Tomosynthesis or Combo acquisition
- Optional stereotactic biopsy device
- Predisposed for Dual Energy

OPTIONAL SEPARATE ACQUISITION WORKSTATION

All the systems can be completed with a separate AWS

- ✔ 2, 3 or 5 MP medical grade monitor
- ✔ Anti-X transparent protection barrier (0,34 or 0,5 mm lead eq.)
- ✔ 24" Color monitor
- ✔ 15" Touchscreen color display
